DAY/DATE/AM/PM/SUN/MOON MODELS

TO SET TIME:
1. PULL out crown to “C” position.
2. TURN crown clockwise to correct time. Day/am/pm/moon will also change.
3. Push in crown to “A” position

NOTE: Remember to set time for am or pm (sun or moon.)

MOON PHASE MULTI-FUNCTION

SETTING THE DAY OF THE WEEK AND THE CURRENT TIME
1. When the second hand is at 12 o’clock, Pull the crown out to the position “C”.
2. Turn the crown to advance the hour/minute hands in a clockwise direction until the day sub-dial displays the current day of the week and the current time is displayed correctly, including if it is AM or PM.
3. Push the crown in to position “A”.

NOTE: Do not set the day by moving the hands in a counterclockwise direction. The day will advance somewhere between midnight and 6AM.

SETTING THE MONTH
NOTE: The month should be set first. If the watch is displaying the day of the month from the 26th to the 31st, follow the instructions below to move it out of this period. The month and date are synchronized such that when adjusting the date at the end of short months (less than 31 days), the month automatically adjusts to the correct date. The month hand begins changing to the next month around midnight of the 30th day. It completes the change around midnight of the 31st. (On the 31st, the position of the month hand is between the current and next month). The month and day will need to be manually adjusted for Leap year.
1. Press pusher “A” fully to advance the hand.
2. Repeat until the hand is displaying the current month.

DO NOT DISPOSE OF BATTERY IN FIRE. DO NOT RECHARGE. KEEP LOOSE BATTERIES AWAY FROM CHILDREN.
